

“JOURNEY OF DISCOVERY”

ANA TZAREV GALLERY: Many of us enjoy looking at art, experiencing the color schemes, trying to figure out what the artist meant or wanted to portray. Ana Tzarev, an international artist whose pieces are inspired by her travels through Asia, Africa, and the Pacific, these pieces present historic, traditional, and daily life. Ana Tzarev’s exhibition “Journey of Discovery,” is one that brings very interesting colors and faces to reality. Her ability to literally take the viewer on a ‘journey’ is incredible. Every piece in this exhibition is created by method of oil on linen. The 6 piece painting, ‘**ROSE SKY**’ is a favorite of mine and can be viewed from the street through a two-story picture window.

Advertisements all around NYC say “See The World Through Ana’s Eyes,” this Croatian born gallery owner sincerely does let us into a new dimensioned world, through her own eyes. Tzarev does an immaculate job of bringing out the fascination of an outside world we do not encounter every day.
